Requirements That Dictate IT Decisions

Opportunity: NEED to Meet HIPAA's Stringent Privacy & Security Rules Throughout Systems

Healthcare organizations are burdened with a variety of evolving standards around the Health Insurance Portability and Accountability Act (HIPAA) and its requirements on the technology infrastructure. IT departments are now charged with the herculean task of finding and implementing best-of-breed technologies that utilize integrated healthcare platforms, enable secure information sharing, document control and compliance.

TechTalk Healthcare events bring you the decision makers who are looking for the most-up-to-date information on technology innovators creating the platforms and applications that ensure compliance with regulations on storage and information exchange. Our events are the place for leaders in healthcare technology to relax, network and hear about the latest mission-critical technologies while enjoying cocktails, appetizers, lunch at a local hot spot, or a steak house dinner.

Healthcare IT professionals are looking for answers on topics such as:

- The challenges of BYOD (Bring Your own device)
- Encryption security of all electronic communications
- Solid remote data backup & well-executed data recovery solutions
- Routine risk analysis and risk management planning

2019 SCHEDULE

June 5 - Boston, MA	Aug 8 - Chicago, IL
July 17 - New York, NY	Oct 17 - Dallas, TX
July 18 - Atlanta, GA	

TECHTALKS are the forum for IT innovators to reach Healthcare technology decision makers.
